

### SUMMARY

Passionate about automation in DevOps. Learning and figuring best way to implement github actions, gitlab-ci, docker, and k8s. In developing and implementing my soft skills and hard skills, I took several actions such as (1) become an apprentice at Bangkit Academy program led by Google, Tokopedia, Gojek, and Traveloka as a cloud computing with google cloud console or GCP, (2) two years' experience at Ministry of Education and Culture Republic of Indonesia as a APIs developer and junior DevOps, and (3) participating in several training such as Coursera, Dicoding, Cisco CCNAv7, and Qwiklabs. (4) do more research about DevOps trends.

---

### EDUCATION

#### **Bachelor of Electrical Engineering | Udayana University**

**July 2018 – July 2022**

- Majoring in Telecommunication and Multimedia Networking with GPA: 3.86/4.00
  - Study several subjects including project management and leadership strategy, computer programming concept, statistics, technic statistics and stochastic
  - Chairman of Community Service Program
- 

### WORKING AND ORGANIZATION EXPERIENCE

#### **Ministry of Education and Culture Republic of Indonesia | Contract Junior DevOps**

**August 2022 – June 2026**

- Responsible for manage APIs, deployment, monitoring, and git repository of application
- Manage automation for deployment, mostly use Docker as builder and runner then GitHub action as trigger
- Lead and keep in touch with different team for some application (Covering PM and EM role)
- Create flow diagram for DevOps architectures base on needs and present it to owner and teams
- Create PDDikti private docker registry

#### **Ministry of Education and Culture Republic of Indonesia | Internship API Developer & Junior DevOps**

**August 2021 - July 2022**

- Be a part of [Satudikti](#) team as API Developer and Junior DevOps including make RESTful APIs
  - Responsible to setup server environments for database, backend, and frontend, including automation of deployment
- 

### COURSE AND CERTIFICATION

- **Certification Course:** Coursera: Architecting with Google Compute Engine Specialization
  - **Certification Course:** Coursera: From Data to Insights with Google Cloud Platform Specialization
  - **Certification Course:** Coursera: Google IT Automation with Python Specialization
  - **Certification Course:** Cisco CCNAv7: Introduction to Networks
  - **Certification Course:** Cisco CCNAv7: Switching, Routing, and Wireless Essentials
  - **Certification Course:** Dicoding: Learn Computer Networking for Beginners
  - **Certification Course:** Dicoding: Learn to Construct Microservices Architecture
- 

### SKILLS

| Software:                   | Language:                           | Personal Skills: |
|-----------------------------|-------------------------------------|------------------|
| Can read Go, Python, Java   | Mother Language Indonesian          | Leadership       |
| Work with Docker, Bash, Git | English (EF SET Upper Intermediate) | Teamwork         |
